

OBD Genie

RVS-OBD

REAR VIEW
SAFETY
A Safe Fleet Brand

The RVS-OBd reprograms the computer of a vehicle so the OEM monitor/radio can be used with an aftermarket camera. Simply connect your backup camera to the OEM monitor/radio with an OEM harness, and plug the OBD Genie to the OBDII port (under your steering column). It's that easy.

HIGHLIGHTS

- Simple Installation
- Programs vehicle for aftermarket camera connection to OEM radio/monitor
- Compatible with a variety of vehicles
