Backup Camera System For Pickup Trucks

RVS-PICKUP

For a perfect backup camera system for your pickup truck, look no further than the RVS-Pickup. This system features the legendary G-Series Monitor and the Tailgate Camera which despite its small size is powerfully built to withstand all weather conditions. The G-Series monitor replaces the existing rear view mirror for a clean look. Its screen is 4.3 inches wide and pushed to the left of the mirror to be more easily viewed by the driver. For an absolute perfect backing up experience, this monitor comes with adjustable grid lines, allowing you to adjust the grid lines to be completely accurate regardless of where you mount the camera. The tailgate camera is composed of an MT9V139 sensor and a lens with a 170° viewing angle with excellent night vision. The rear view camera is completely weatherproof with an IP68 rating, strong and reliable, shock resistant with a 10G vibration rating (highest in the industry) and comes with a full year warranty. The tailgate camera mounts to the handle and looks OEM and flush with the vehicle. The camera is very easy to install and makes hitching and backing up easy.
